

Economics Challenge

Thirty one economics students from the three Plano ISD senior high schools competed in the State Economics Challenge at the Federal Reserve Bank in Houston, TX on April 4, 2007. The National Council for Economic Education annual Economics Challenge is the only national competition to foster interest among high school students in economics by recognizing their achievements and offering a fun and competitive way to showcase their knowledge. The first part of the competition is a round of multiple-choice tests over microeconomics, macroeconomics, and international economics. The second part is a quiz-bowl format over all topics in economics.
