

The source on document cameras (ELMOs) has changed.  
Follow these steps to view the document camera on a projector screen.

1. Download ELMO Image Mate from the App Depot

2. Image Mate will install an icon on the desktop
3. Launch Image Mate
4. The small Image Mate menu will appear
5. Click the Live Cam button to view your document on the projector

6. If the source needs to be changed, press the Source button on the projector remote (not the S-Video button) and select HDMI. Then click OK.

7. Use the mouse to toggle between the desktop and the ELMO.
8. Launch Image Mate then minimize the small menu until needed. Image Mate can be open all day and ready when needed in class.
