# What your child will learn in Grade 5

### Grade 5 **Literacy Goals**

| Types of Skills | Goals   |
|-----------------|---|
| Foundational    | In fifth grade, a portion of the literacy block should continue to focus on developing & sustaining word structure knowledge through demonstrating & applying phonetic (decoding) knowledge & spelling (encoding) knowledge for listening, speaking, reading, writing, and thinking.  |
| Reading         | In fifth grade, students develop & sustain comprehension & response skills while listening & reading. These skills should progress throughout the year as students use metacognitive strategies to determine author's purpose, analyze craft, & recognize genre characteristics & structures in increasingly complex texts. |
| Writing         | In fifth grade, students develop & sustain oral & written language skills to communicate ideas effectively. By using the writing process recursively, students will compose multiple texts that consider audience & purpose, apply appropriate genre characteristics & craft, & determine appropriate mode of delivery.     |
