**"We are most excited about how this support will enhance the educational experience and benefits students will receive. Students participating in this impressive academic track will earn college credit while in high school and receive hands-on experience and mentorship from healthcare professionals. They will be ready for what lies ahead after graduation, whether that is entering a four-year university or pre-med program; or entering the workforce with one of the several technical certificates this program offers."**

**Jerri Garison, president,  
Baylor Regional Medical Center at Plano**
