

Versant Health Estimator Tool

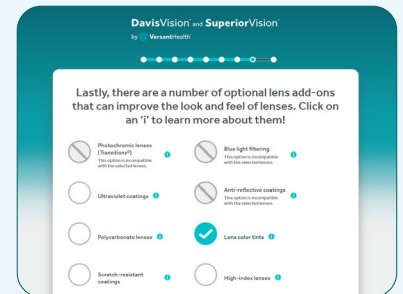

An interactive resource that helps members prepare for an eye exam, make decisions at enrollment time, or maximize the benefits they already have.

A Closer Look at the Tool

Selecting eyewear preferences

Navigating lens options

Demonstrating in-network value

Easy To Use and Open to All

- Provides users with a simple, intuitive way to get an **estimate** of their **approximate out-of-pocket costs** when visiting an in-network eye care provider, reducing financial surprises and demonstrating value
- Can be used by both potential and existing members – does not require personal information or an account

Guided Experience Focused on Member Education

- Users are guided through a variety of anonymous, non-invasive questions about their eye care, from vision correction to eyewear preferences
- Questions are accompanied by helpful descriptions that boost vision benefits knowledge on topics such as retinal imaging and lens technology
