

The Mobile Broadcast Cart

What is it all about?

The Mobile Broadcast Cart

The mobile broadcast carts (MBC) are designed to serve as the focal point of our district-wide 116 channel cable TV system. The capability now exists to allow live video production to occur within a building and be broadcast and received by any campus in the district. Of course, any video production can be recorded and re-broadcast at a later time using this same mobile broadcast cart.

MBC Assistant

This presentation is designed to guide you through the use of the MBC. Included is an inventory explaining all of the equipment and accessories, a set up guide, and ideas on how to use the MBC in your classroom and/or school.
